Preface vii

Conference Information viii

Contents ix

Chapter 1. Electron–phonon interaction

GHz surface acoustic waves as a probe of composite fermions in two-dimensional electron systems
R.L. Willett and L.N. Pfeiffer 1

Collective excitations of the fractional quantum Hall effect
C.J. Mellor, J.E. Digby, R.H. Eyles, A.J. Kent, K.A. Benedict, L.J. Challis, M. Henini, C.T. Foxon and J.J. Harris 5

Interaction of phonons with 2D exciton gas
A.V. Akimov, E.S. Moskalenko, L.J. Challis and A.A. Kaplyanskii 9

Electron energy relaxation in low-dimensional systems
M.N. Wybourne 13

Phonon spectroscopy with tunnel junctions in high magnetic fields
S. Roshko, V. Zhitomirsky, J. Cooper, U. Wiesner, W. Dietsche and K. Eberl 16

Phonon-assisted tunnelling GaAs/(AlGa)As resonant tunnelling devices
F.F. Ouali, N.N. Zinov'ev, L.J. Challis, A.V. Akimov, D.N. Hill, E.S. Moskalenko, F.W. Sheard and M. Henini 19

The acousto-electric effect in the 2-D hole system using SAW
V.W. Rampton, M.K. Ellis, P.F. Hennigan, I. Kennedy, C.J. Mellor and M. Henini 22

Phonon-drag effect in 2D hole gases
D. Lehmann, Cz. Jasiukiewicz, R.E. Strickland, K.R. Strickland, A.J. Kent and T. Paszkiewicz 25

Ultrafast dynamics of optic phonons in a 2D electron gas
J.J. Baumberg and D.A. Williams 28

Phonon emission in resonant tunnelling structures
J.K. Wigmore, M. Giltrow, M. Sahraoui-Tahar, A.G. Kozorezov, J.H. Davies, C.A. Stanley, B. Vogel and C.D.W. Wilkinson 31

Electron mobility and terahertz absorption due to interactions with confined acoustic phonons in a free-standing quantum well
V.V. Mitin, F.T. Vasko, N.A. Bannov and M.A. Stroscio 34

Electron-phonon coupling and phonon subbands in small, electrically heated metal wires
N. Perrin and M.N. Wybourne 37

Electron scattering rates due to confined and resonant acoustic phonons in a quantum wire
N. Nishiguchi 40

Using non-equilibrium acoustic phonons to probe disordered quantum wires
M.P. Blencowe 43

Optical phonon effect in quasi-one-dimensional semiconductor quantum wires: Band-gap renormalization
N.T. Dan and F. Bechstedt 47

Double-dip negative magnetoresistance observation in magneto-acoustic measurements in InSb
B.A. Aronzon, I.L. Drichko and F. Guillon 50

Screening of longitudinal optical phonons in CdSSe nanocrystals by photoexcited carriers
G. Tamulaitis, P.A.M. Rodrigues and P.Y. Yu 53

Phonon scattering by impurities in semi-insulating GaAs wafers
Z. Xin, F.F. Ouali, L.J. Challis, B. Salce and T.S. Cheng 56

Effect of nonequilibrium acoustic phonons on exciton states in interrupted grown GaAs/$Al_{0.33}Ga_{0.67}As$ quantum wells
E.S. Moskalenko, A.V. Akimov, A.A. Kaplyanskii, A.L. Zhmodikov, L.J. Challis, T.S. Cheng and C.T. Foxon 59

Effects of confinement on electron–phonon coupling for the two-dimensional electron gas in a GaAs/AlGaAs quantum well
P. Hawker, C. Jagadish and M.R. Melloch 62

Effect of phonon scattering on free-carrier absorption in quantum well structures
C.-C. Wu and C.-J. Lin 65

Electron–phonon scattering time in crystalline disordered $Ti_{1-x}Al_x$ alloys
J.J. Lin and C.Y. Wu 68

Control of phonon properties in electron–phonon–proton coupled system
E. Matsushita 71

The origin of the sharpness of the maximum in the phonon thermal conductivity of $(Ta_{1-x}Nb_xSe_4)_2I$ at low temperature
J.C. Lasjaunias, A. Smontara, R. Maynard and F. Levy 74

Phonon thermal conductivity of the inorganic quasi-one-dimensional conductors
A. Smontara, K. Biljaković, A. Bilušić, J. Mazuer, P. Monceau, H. Berger and F. Levy 77

Lattice thermal conductivity of Nb-based alloy superconductors and phonon scattering by electrons
M. Ikebe, T. Naito, H. Fujishiro, K. Noto, N. Kobayashi and K. Mori 80

Manifestation of electron–phonon interaction in phonon anomaly, superconductivity and transport properties of layered 2*H*-NbS_2
K. Motizuki, Y. Nishio, M. Shirai and N. Suzuki 83

Ultrasonic investigation of Fermi surface
T. Goto, K. Morita, S. Nakamura, Y. Nemoto, O. Suzuki, M. Kataoka and S. Sakatsume 86

Ultrasonic investigation of quadrupolar response in Kondo system $Ce_xLa_{1-x}B_6$
S. Nakamura, T. Goto and S. Kunii 89

Acoustic de Haas–van Alphen effect to determine the electron–lattice coupling
M. Kataoka and T. Goto 92

Lattice anomaly and dynamics of $CuGeO_3$
M. Fujita, K. Ubukata, M. Arai, T. Tonegawa, M. Mino, M. Motokawa, K. Knight, B. Forsyth, S.M. Bennington, J. Akimitsu and O. Fujita 95

Inelastic X-ray spectroscopy with high energy resolution under high pressures
E. Burkel, M. Schwoerer-Böhning, C. Seyfert and R.O. Simmons 98

Elastic properties of $CuGeO_3$ studied by Brillouin scattering
H. Yamaguchi, M. Yamaguchi and T. Yagi 101

Raman-scattering study of $CuGeO_3$
H. Kuroe, J. Sasaki, T. Sekine, Y. Sasago, M. Hase, N. Koide, K. Uchinokura, H. Kojima, I. Tanaka and Y. Shibuya 104

Raman scattering of $CuGeO_3$
N. Ogita, Y. Tsunezumi. H. Aoki, M. Udagawa, O. Fujita, A. Ogihara and J. Akimitsu 107

Heat capacity of the spin-Peierls compound $CuGeO_3$
S. Sahling, G. Reményi, J.C. Lasjaunias, N. Hegman, G. Dhalenne and A. Revcolevschi 110

Magnetic relaxation of spins in $CaO–P_2O_5$ system
N. Kitamura, H. Ohta and M. Motokawa 112

The roles of spin wave and phonon in the temperature dependence of magnetization in an itinerant electron ferromagnet
I. Yoshida and D.J. Kim 115

Phonon mechanism of the anomalous volume behavior of ferromagnetic metals
N. Miyai, T. Kizaki and D.J. Kim 118

Chapter 2. High-T_c superconductivity

Orientational disorder and the intermolecular potential of FCC C_{60}
J.D. Axe, P.C. Chow, S.C. Moss and P. Wochner 121

Ultrasonic attenuation and sound velocity changes in a superconducting $La_{2-x}Sr_xCuO_4$ single crystal
H. Zhang, M.J. McKenna, C. Hucho, B.K. Sarma, M. Levy, T. Kimura, K. Kishio and K. Kitazawa 125

Role of phonons in electronic and spin excitations of high-T_c superconductors
S. Tajima and J. Schützmann 128

Phonon crystal-field excitations in high-T_c superconductors
T. Ruf 132

Doping dependence of the oxygen isotope effect in $YBa_2Cu_3O_x$
D. Zech, K. Conder, H. Keller, E. Kaldis and K.A. Müller 136

Raman study of the oxygen vibrations in 123-superconductors
E. Liarokapis, N. Poulakis, D. Palles, K. Conder, E. Kaldis and K.A. Müller 139

Evidence for polaronic states in metallic $YBa_2Cu_3O_{6.9}$ and $La_{1.85}Sr_{0.15}CuO_4$ from ultrafast phonon Raman spectroscopy
D. Mihailovic, T. Mertelj, B. Podobnik, J. Demsar, P. Canfield, Z. Fisk and C. Chen 142

Unconventional electron–phonon interaction and anharmonicity in superconducting cuprates
T. Egami, R.J. McQueeney, W. Dmowski, N. Seiji, H. Yamauchi, M. Arai, S. Ishihara and M. Tachiki 145

Rotational dynamics of C_{60} above and below T_s
L. Pintschovius, S.L. Chaplot and G. Roth 148

Low-frequency excitations in Rb_3C_{60} and Rb_6C_{60}
H. Schober, B. Renker and F. Gompf 151

Model of higher T_c in phonon-mediated superconductors A_3C_{60}
E. Matsushita 154

Temperature dependence of Raman spectrum in C_{70} single crystals
Y. Tanokura, M. Nishimura, T. Sekine and T. Takeuchi 157

Thermal conductivity of hard carbon prepared from C_{60} fullerene
A. Smontara, K. Biljaković, D. Starešinić, D. Pajić, M.E. Kozlov, M. Hirabayashi, M. Tokumoto and H. Ihara 160

Thermal conductivity and diffusivity of $Nd_{2-x}Ce_xCuO_4$
H. Fujishiro, M. Ikebe, M. Yagi, M. Matsukawa, H. Ogasawara and K. Noto 163

Thermal expansion, thermal conductivity of MMTG-$YBa_2Cu_3O_x$ and phonon–phonon interaction
H. Ogasawara, M. Matsukawa, K. Noto, H. Kimura and H. Tsukada 166

The Eliashberg electron–phonon theory for the superconducting alkali-metal-doped fullerenes
L. Degiorgi, E.J. Nicol, A. Zettl, G. Grüner and P. Wachter 169

Phonon contribution on the high T_c Cooper pairing investigated by tunnelling spectroscopy
R. Aoki, H. Murakami, T. Kita, M. Shirai, Y. Nishio, V.M. Svistunov, A.I. Dyachenko and D.N. Afanassyev 172

Surface acoustic waves in high-T_c superconducting thin films
M. Akinaga, H. Ohkubo, T. Fukami and T. Aomine 175

Surface acoustic wave investigations of $Y_{1-x}Pr_xBa_2Cu_3O_y$ films
M. Yoshizawa, K. Shiga, N. Yoshimoto, N. Ôki, H. Iwasaki, S. Kenmochi and N. Kobayashi 179

Ultrasonic study of lattice instability in high-T_c superconductors
T. Takanohashi 182

Interaction of carriers with phonons in single- and poly-crystalline high T_c superconductors estimated from phonon thermal conductivity
M. Onuki, T. Fujiyoshi and T. Hoshino 186

The influence of $SrSO_4$ additives to $Bi_2Sr_2CaCu_2O_8$ high temperature superconductors
U. Escher, R. Samuel, A. Gladun and E. Hegenbarth 189

Phonon contribution to superconductivity of $Bi_2Sr_2CaCu_2O_8$
D. Shimada, Y. Shiina, N. Miyakawa and N. Tsuda 192

Hysteretic effect of sound velocity in sintered $Bi_2Sr_2CaCu_2O_{8+\delta}$ with excess oxygen
R. Kondo, K. Kawatani, F. Ichikawa, T. Fukami and T. Aomine 195

Micro-probed Raman scattering study of optic phonons in $YBa_2Cu_3O_x$ and Bi–Sr–Ca–Cu–O
A. Sakai, H. Umeki, A. Inoue and Y. Hidaka 198

Structural properties of as-grown and reduced Pr_2CuO_4 single crystals investigated by ion channeling
T. Haga and Y. Abe 201

Phonon anomaly of under-doped $YBa_2Cu_3O_{6.6}$ studied by neutron scattering
T. Nishijima, M. Arai, K. Yamaya, Y. Okajima, A.C. Hannon and T. Otomo 204

Anisotropy effects on superconductivity in layered material NbS_2
M. Shirai and Y. Nishio 207

Strong coupling between phonons of a peculiar branch and holes in the CuO_2 layer of high-T_c cuprates
K. Motida 210

Effects of Zn doping on lattice specific heat in La_2CuO_4
Y. Okajima, S. Iio and K. Yamaya 213

Elastic softening in single-crystalline $La_{2-x}Sr_xCuO_4$ around $x = \frac{1}{8}$
S. Sakita, T. Suzuki, F. Nakamura, M. Nohara, Y. Maeno and T. Fujita 216

Influence of the orthorhombic distortion on the lattice vibrations in La_2CuO_4
S.L. Chaplot, W. Reichardt and L. Pintschovius 219

Phonon Raman scattering of Sr_2RuO_4
M. Udagawa, T. Minami, N. Ogita, Y. Maeno, F. Nakamura, T. Fujita, J.G. Bednorz and F. Lichtenberg 222

Structural instability of high-T_c superconductor $La_{1.85}Sr_{0.15}CuO_4$
M. Arai, H. Shibazaki, T. Nishijima, T. Arakawa, K. Ubukata, M. Fujita, Y. Murakami, H. Kawada, K. Yamada, T. Lee and Y. Endoh 225

Chapter 3. Glasses

Localized high-frequency phonons in amorphous materials
J.I. Dijkhuis, A.J. Scholten and A.V. Akimov 228

Transport and vibrational lifetimes in amorphous structures
R. Orbach 231

Sound amplification by stimulated emission of phonons using two-level systems in glasses
J.-Y. Prieur, M. Devaud, J. Joffrin, C. Barre, M. Stenger and M. Chapellier 235

Interacting tunneling systems in ionic crystals
C. Enss 239

Anomalous dielectric properties of amorphous solids at low temperatures
D.D. Osheroff, S. Rogge and D. Natelson 243

Acoustic properties of glasses and polycrystals at very low temperatures
P. Esquinazi, R. König and F. Pobell 247

Light scattering by low-energy excitations in glasses
A.P. Sokolov 251

Low-temperature anomalies of glasses: What can we learn from computer simulations?
A. Heuer and R.J. Silbey 255

Experimental evidence for rotated tetrahedra as tunneling states in neutron-irradiated quartz
C. Laermans and V. Keppens 258

Ultrasonic attenuation in glasses of SiO_2–GeO_2 mixture
T. Kosugi, H. Kobayashi and Y. Kogure 261

A theory of phonons in amorphous systems and liquids
J.L. Beeby 264

How do two-level-systems come about?
B.E. White Jr. and R.O. Pohl 267

Interstitial resonance modes as a source of the boson peak in glasses and liquids
A.V. Granato 270

Light scattering study of glass forming liquid: Propylene glycol
A. Yoshihara, H. Sato, K. Takanashi and S. Kojima 273

Internal friction of SiO_2 glasses with excessive and deficient oxygen
H. Kobayashi, T. Kosugi and Y. Kogure 276

Nonlinear dielectric susceptibilities of the proton–glass state in RDP–ADP mixed crystals
Y. Miura, N. Matsunaga, H. Orihara, T. Mamiya and H. Terauchi 279

Glass transition in $K_{1-x}(NH_4)_xI$ mixed crystals
K. Yagi, T. Umeki, H. Terauchi and Y. Noda 281

Acoustic properties of dilute PdFe and PtFe spin glasses
P. Esquinazi, R. König, B. Neppert and F. Pobell 284

Investigation on permanently densified vitreous silica by means of neutron scattering
A. Hiramatsu, M. Arai, H. Shibazaki, M. Tsunekawa, T. Otomo, A.C. Hannon, S.M. Bennington, N. Kitamura and A. Onodera 287

Vibrating reed experiments on compacted vitreous silica
G. Weiss, A. Daum, M. Sohn and J. Arndt 290

Bose peak in the Raman spectra of densified SiO_2 and GeO_2 glass under high pressure
S. Sugai, H. Sotokawa, D. Kyokane and A. Onodera 293

Phonon attenuation in glasses studied by picosecond ultrasonics
C.J. Morath, G. Tas, T.C-D. Zhu and H.J. Maris 296

Phonon–roton states and electronic transport properties
P. Häussler 299

Wave-like and diffusive heat transport in a-SiO_2 below 1 K
M. Meissner, N. Sampat and P. Strehlow 302

Acoustic properties of crystals at very low temperatures – Comparison with glasses
G. Weiss, M. Hübner,.J. Classen, C. Enss and S. Hunklinger 305

Low-temperature thermal conductivity of vitreous silica under high pressure
M. Jäckel, K. Wagner and E. Hegenbarth 308

Interacting defects in glasses
H.M. Carruzzo, E.R. Garnnan and C.C. Yu 311

Distribution of double-well potentials in SiO_2 and SiO_2:Ge glasses
Y. Kogure, T. Kosugi and H. Kobayashi 314

Thermal transport in densified amorphous solids
D.-M. Zhu and K.-I. Cheong 317

Chapter 4. Disordered systems and quasicrystals

Anderson localization and quantum chaos in acoustics
D. Sornette 320

Anomalous localization and fluctuations of virbational modes on fractals
A. Petri 324

Vibrations in quasicrystals: hierarchies and localization
C. Janot and M. de Boissieu 328

Third sound propagation in quasicrystals
K. Kono 332

The dynamic effective charges of icosahedral boron by the bond-charge model
K. Shirai and S. Gonda 336

Vibrational density of states, dynamical structure factor and eigenstates of icosahedral models
H. Böttger and G. Kasner 339

Triple-axis quasi-elastic neutron scattering study of phason dynamics in a single-grain quasicrystal of AlPdMn
S. Lyonnard, G. Coddes, B. Hennion, R. Bellissent and Y. Calvayrac 342

Elastic properties of quasicrystals
J.E. VanCleve, B.E. White and R.O. Pohl 345

Heat conduction in disordered anharmonic systems
H. Böttger, T. Damker and R. Poetzsch 348

Fracton decay in nonlinear fractal systems
K. Yakubo, M. Nakano and T. Nakayama 351

Fractal drums and the Weyl–Berry–Lapidus conjecture
Y. Hobiki, K. Yakubo and T. Nakayama 354

An efficient method for computing response functions for large-scale vibrational systems
T. Terao and T. Nakayama 357

Anomalous self-diffusion of particles in a classically mesoscopic regime
M. Goda, T. Okabe, H. Yamada and M. Kobayashi 361

Statistical properties of phonon transmission in one-dimensional disordered system with long-range correlation
H. Yamada and M. Goda 364

The lattice dynamics of a dipolar disordered crystal of 2-3-dimethylanthracene
M. Dörr, J. Kalus, M. Monkenbusch, I. Natkaniec and U. Schmelzer 368

Raman scattering of disordered SiC
S. Nakashima, K. Kisoda, H. Niizuma and H. Harima 371

Low-frequency phonon structures in disordered systems probed by femtosecond spectroscopy
Y. Kai, T. Ariyoshi, S. Kinoshita, M. Yamaguchi and T. Yagi 374

Universal feature of vibrational modes of disordered materials investigated via optical spectra of doped probe molecules
Y. Ichino, Y. Kanematsu and T. Kushida 377

High-pressure Brillouin study on the orientationally disordered phase of methane
S. Sasaki, N. Nakashima and H. Shimizu 380

Chapter 5. Lattice dynamics

Intrinsic localized modes and related stability properties in nonlinear periodic lattices
J.B. Page 383

Driven intrinsic localized modes and their stability in anharmonic lattices with realistic potentials
T. Rössler and J.B. Page 387

Intrinsic localized anharmonic modes at surfaces and edges
U. Schröder, D. Bonart and A.P. Mayer 390

A Gauss procedure for the construction of localized solitons in anharmonic chains
R. Dusi and M. Wagner 393

Anharmonic lattice dynamics and neutron-scattering spectra in BCC transition metals
D. Strauch and T. May 396

Constructive role of anharmonicity in thermal conductivity
M. Wagner, R. Dusi and M. Grimm 399

Theory of instability phenomena in crystals
Y. Aikawa and K. Fujii 402

A dynamical theory of nonlinear lattices at finite temperatures
M. Sugiyama 405

Quantum kinetics of coherent optical phonons in semiconductors–Non-Markovian behaviour induced by anharmonic renormalization
U. Wenschuh and W. Schäfer 408

On the phase space in FPU lattices
K. Fukamachi 411

Lattice vibration on pseudo-lattices
K. Wada, Y. Kabasawa and A. Kawada 414

Phonon and the intramolecular motions in crystalline *trans*-stilbene
K. Saito and I. Ikemoto 417

Computer simulation of melting of polymer crystals
N. Takahashi, M. Hikosaka and T. Yamamoto 420

Ultrasonic properties of one-dimensional $(TaSe_4)_2I$
M. Saint-Paul, R. Britel, J.C. Lasjaunias, P. Monceau and F. Levy 423

Dynamics of random overlayes
C.S. Jayanthi, S.Y. Wu and J.A. Cocks 425

Surface lattice dynamics of KBr epitaxially grown on RbCl(0 0 1)
E.S. Gillman, J. Baker, J.J. Hernandez, G.G. Bishop, J.A. Li, S.A. Safron, J.G. Skofronick, D. Bonart and U. Schröder 428

Surface dynamics of $Bi_2CaSr_2Cu_2O_8$
F.W. de Wette, U. Paltzer and U. Schröder 431

Ab initio calculations of phonons at semiconductors surfaces
U. Schröder, J. Fritsch and P. Pavone 434

Atomic thermal vibrations in semiconductors: Ab initio calculations and EXAFS measurements
D. Strauch, P. Pavone, N. Nerb, K. Karch, W. Windl, G. Dalba and P. Fornasini 436

Ab initio phonon calculations in solids
P. Pavone, R. Bauer, K. Karch, O. Schütt, S. Vent, W. Windl, D. Strauch, S. Baroni and S. de Gironcoli 439

Full ab initio calculation of second-order infrared and Raman spectra of elemental semiconductors
D. Strauch, W. Windl, H. Sterner, P. Pavone and K. Karch 442

Lattice dynamics of BN and AlN
K. Karch, F. Bechstedt, P. Pavone and D. Strauch 445

First-Principles study of thermal properties of 3C SiC
K. Karch, P. Pavone, A.P. Mayer, F. Bechstedt and D. Strauch 448

First-principles study on lattice dynamics and Electron–Phonon interaction in an oxide spinel $LiTi_2O_4$
T. Oda, M. Shirai, N. Suzuki and K. Motizuki 451

First-principles calculation of lattice dynamics and electron–phonon interaction in high pressure phase of solid iodine
N. Suzuki, H. Sakamoto, T. Oda and M. Shirai 454

Photo induced narrowing of TO–LO splitting and mobile defect in AgCl
K. Wakamura, M. Sugioka, K. Kawakami and M. Kurita 457

Low energy excitation in cation superionic conductors
M. Kobayashi, T. Tomoyose and M. Aniya 460

Phonons and the mechanism of ion transport in some superionic conductors
M. Aniya and K. Wakamura 463

Aging effects on translational lattice vibrations in ice I_h
H. Fukazawa, T. Ikeda, T. Hondoh, V.Ya. Lipenkov and S. Mae 466

Molecular dynamics studies of proton ordering effects on lattice vibrations in ice I_h
H. Itoh, K. Kawamura, T. Hondoh and S. Mae 469

Molecular dynamics computer experiment of solitons in model crystals
S. Ozawa and Y. Hiki 473

Transient heat transfer in a Lennard–Jones crystal by molecular dynamics
S. Volz, J.-B. Saulnier and M. Lallemand 476

The pressure dependence of the $TA_1[1\,1\,0]$ phonon frequencies in the ordered Invar alloy $Fe_{72}Pt_{28}$ at pressures up to 7 GPa
M. Schwoerer-Böhning, S. Koltz, J.M. Besson, E. Burkel, M. Braden and L. Pintschovius 479

Stage dependence of phonons in misfit layer compounds $(MS)(NbS_2)_n$ (M = Sn,Pb; $n = 1, 2$)
M. Hangyo, K. Kisoda, S. Nakashima, A. Meerschaut and J. Rouxel 481

Phonons in binary BCC lithium–sodium alloys
M. Imaizumi, F. Djanikian and B. Laks 484

Lattice dynamics of a layered material BC_2N
H. Nozaki and S. Itoh 487

Anomaly in the phonon dispersion of a disordered alloy, $Cu_{0.715}Pd_{0.285}$
Y. Noda, K. Ohshima and Y. Endoh 490

Optical phonons in GaN
T. Azuhata, T. Matsunaga, K. Shimada, K. Yoshida, T. Sota, K. Suzuki and S. Nakamura 493

Lattice dynamics of $CuAlS_2$ and $CuAlSe_2$
T. Azuhata, T. Terasako, K. Yoshida, T. Sota, K. Suzuki and S. Chichibu 496

Phonons – a diffusion motor in intermetallics?
O.G. Randl, G. Vogl and W. Petry 499

Chapter 6. Light and neutron scattering

Evidence for interface terraces in Ge/Si quantum wells obtained by Raman scattering
O. Brafman, R. Manor, M.A. Aroujo Silva, F. Cerdeira and J.C. Bean 502

Spin–phonon interactions in the Raman spectra of one- and two-dimensional quantum spin antiferromagnets
S. Sugai, J. Wada, K. Yamada, S. Hosoya and Y. Endoh 505

Resonant hyper-Raman scattering in semiconductor quantum dots
K. Inoue, A.V. Baranov and A. Yamanaka 508

Isotope effects on the Raman spectra of CuCl
A. Göbel, T. Ruf, M. Cardona and C.T. Lin 511

Similarities and differences of phonon modes in silicon materials depending on dimension: Raman spectroscopy of polysilanes and siloxene
K. Todori and S. Hayase 514

Low-frequency Raman spectra of disordered molecular systems
H. Nakayama and K. Ishii 517

A model calculation of the characteristic Raman modes in the tetrahedral network structures of $GeSe_2$
K. Inoue, O. Matsuda and K. Murase 520

Pressure–temperature phase diagram of molecular crystal H_2S by Raman spectroscopy
H. Nakayama, H. Yamaguchi, S. Sasaki and H. Shimizu 523

Elastic property and Raman spectrum evolutions during dehydration process of polyacrylamide gel
K. Hara, T. Masuike, A. Nakamura and N. Hiramatsu 526

Raman scattering spectra of internal modes in triglycine sulphate
A. Sakai and A. Araya 529

Raman scattering in organic conductors $(DMe\text{–}DCNQI)_2Cu$
T. Sekine, K. Tsutsumi, Y. Tanokura, S. Aonuma, H. Sawa and R. Kato 532

Raman spectroscopy of germanium films deposited with cluster–beam technique
M. Wakaki, M. Iwase, Y. Show, K. Koyama, S. Sato, S. Nozaki and H. Morisaki 535

Raman spectroscopy of quantum paraelectric $SrTiO_3$ fine particles
T.K. Song, J. Kim, S.-I. Kwun, C.J. Kim and J.-J. Kim 538

The relaxation time of the polarization fluctuation in ferroelectric TGS and TGSe by impulsive stimulated Brillouin scattering
H. Furuta, S. Yoshioka, Y. Tsujimi, Y. Shimada and T. Yagi 541

Forced Brillouin spectroscopy using optical generation of phonons
T. Sonehara and H. Tanaka 544

Brillouin scattering study in the GaN epitaxial layer
Y. Takagi, M. Ahart, T. Azuhata, T. Sota, K. Suzuki and S. Nakamura 547

Brillouin scattering study in TeO_2
M. Ahart, T. Yagi and Y. Takagi 550

Brillouin scattering under temperature gradient
K. Hattori, K. Sakai and K. Takagi 553

Superheterodyne Brillouin spectroscopy using frequency-tunable lasers
H. Tanaka and T. Sonehara 556

Elastic properties of dense H_2O-ices studied by Brillouin spectroscopy
H. Shimizu 559

A new photoacoustic/photothermal device for real-time materials evaluation: An automated means for performing transient grating experiments
J.A. Rogers and K.A. Nelson 562

Charge transfer and phonons in misfit layer compounds $(RS)_xNbS_2$ (R = rare earth; $x \approx 1.2$)
K. Kisoda, M. Hangyo, S. Nakashima, T. Terashima and N. Kojima 565

Diluted effects on n-propanol
M. Takahashi, S. Kojima, A. Wakisaka and K. Koga 568

Neutron scattering study of K_2ZnBr_4
H. Mashiyama, M. Takesada, T. Yagi, H. Shigematsu and Y. Oohara 571

A study of proton dynamics in ice using an excited state proton transfer (ESPT) of a dopant molecule and its fluorescence
T. Akiyama, K. Okazaki, Q. Ping, K. Abe and T. Shigenari 574

Chapter 7. Phase transitions

New excitations in quantum paraelectrics
E. Courtens, B. Hehlen, G. Coddens and B. Hennion 577

Pre-fractal domain patterns optically observed in KDP-type ferroelectrics KD_2PO_4 and RbH_2PO_4
T. Ozaki and N. Yamada 581

Nonlinear elastic coefficients of KDP
U. Straube and H. Beige 584

Rhodes–Wohlfarth ratio and anomalous specific heat in displacive type ferroelectrics
M. Tokunaga 587

Low–frequency Raman scattering of ferroelectric $LIH_3(SeO_3)_2$ near the melting point
M. Kasahara, T. Shima, P. Kaung and T. Yagi 590

Acoustic phonon dispersion of SiO_2 (quartz) near the incommensurate phase transition
S. Ishibashi, K. Abe, M. Suzuki, Y. Sasaki and T. Shigenari 593

Brillouin scattering of the order–disorder type phase transition in $NaNO_3$
S. Yoshida, Y. Tsujimi and T. Yagi 596

Structural phase transitions and the determinant of the dynamical matrix
H. Schober 599

Structural study of phase transition in $K_2Zn_2(SO_4)_3$ langbeinite
C. Moriyoshi, K. Itoh and T. Hikita 602

The virtual intermediate states model for reconstructive α–β phase transition in K_2ZnBr_4
M. Takesada, H. Mashiyama and T. Yagi 605

Anomalous LO-phonon broadening at the phase transition in KD_2PO_4
I. Tamura, Y. Noda, Y. Todate and S. Ikeda 608

Soft phonon and low-temperature phase transitions in Rb_2ZnBr_4
H. Shigematsu, H. Mashiyama, Y. Oohara and K. Ohshima 611

Soft mode observation in paraelectric SbSBr
T. Inushima 614

Soft mode spectroscopy of bismuth titanate single crystals
S. Kojima and S. Shimada 617

Comparison of the soft polar phonon in hexagonal barium titanate and $ATiO_3$ perovskite compounds
A. Yamanaka and K. Inoue 620

Sound velocity of molten silicon
N. Yoshimoto, M. Ikeda, M. Yoshizawa and S. Kimura 623

Nonlinear dielectric responses in resonant systems
Y. Ishibashi and H. Orihara 626

Hypersonic investigation of electrochemical interfaces
A. Harata, Q. Shen and T. Sawada 629

Temperature dependence of the thermal vibrations in $NaK_{1-x}(NH_4)_x\ C_4H_4O_6 \cdot 4H_2O$ ($x = 0.28$)
Y. Shiozaki, H. Kabasawa, E. Suzuki and R. Nozaki 632

Infrared study of $BaTiO_3$ thin films
M. Wada and T. Ohtuki 635

Pressure effect on the elastic constants of magnetite
S. Isida, M. Suzuki, S. Todo, N. Môri and K. Siratori 638

Memory echo by phonon hole burning mechanism
F. Tsuruoka 641

Hydrogen potentials and wave functions in KDP and $KHCO_3$
S. Ikeda 644

Successive phase transitions of hexagonal barium titanate: soft acoustic mode and coupled acoustic–soft optic mode
M. Yamaguchi, M. Watanabe, Y. Akishige, K. Inoue and T. Yagi 647

Chapter 8. Quantum liquids and Kapitza resistance

Enhanced heat capacity of amorphous helium films
A. Golov and F. Pobell 650

Kapitza transmission through atomically clean silicon (1 1 1) surfaces
K.H. Wichert, C. Reimann, G. Blahusch and H. Kinder 653

Local temperature measurement and Kapitza boundary resistance
A.M. van den Brink and H. Dekker 656

Reflection of high-frequency acoustic phonons from solid–liquid interfaces studied by picosecond ultrasonics
G. Tas, C.J. Morath and H.J. Maris 660

Quantum zero sound in liquid helium-3
C. Barre, J.-Y. Prieur, J. Joffrin, M. Stenger and M. Chapellier 663

Dynamics of the sliding transition in the Wigner solid on liquid ^{4}He
K. Shirahama, S. Ito, H. Suto and K. Kono 666

Amplitude dependence of first sound velocity in superfluid ^{4}He
Y. Sasaki, H. Kishi, G. Zhang, K. Karaki and Y. Okuda 669

Heat transport in pool boiling liquid ^{3}He below 1 K
M. Maeda, H. Takahashi, Y. Fujii, Z.M. Li, T. Shigematsu, T. Shigi, M. Yamaguchi and M. Nakamura 672

Precise measurement of zero sound velocity in normal ^{3}He
K. Matsumoto, T. Ikegami, S. Ito, M. Kirigaya and Y. Okuda 675

Structural relaxation and surface diffusion of quench-condensed hydrogen films
J. Classen, K. Eschenröder and G. Weiss 678

Chapter 9. Phonons in superlattices

Picosecond ultrasonics study of metallic multilayers
B. Perrin, B. Bonello, J.-C. Jeannet and E. Romatet 681

Spatial and dynamical properties of optical phonons in $Al_xGa_{1-x}As$ and $GaAs/Al_xGa_{1-x}As$ superlattices: Beyond the mean field approach
D.S. Kim, P.H. Song, S.H. Jhi, Y.S. Lim, E.J. Shin, Y.H. Yee, J.S. Khim, J. Ihm, J.H. Lee, J.S. Chang, D.H. Woo, K.N. Kang, D. Kim and J.J. Song 684

Brillouin scattering from single crystal Cu/Ni superlattices
A. Yoshihara, K. Sakaue, M. Niboshi, T. Nagahara, N. Sano and H. Terauchi 687

Thermal properties of $(GaAs)_N(Ga_{1-x}Al_xAs)_N$ (0 0 1) superlattices
H. Grille, K. Karch and F. Bechstedt 690

Dynamical properties of phonons in single-and double-superlattice systems
S. Mizuno and S.-I. Tamura 693

Enhancement of mode-converted transmission of phonons in superlattices
H. Kato, H.J. Maris and S. Tamura 696

Thermal conductivity of GaAs/AlAs superlattices
W.S. Capinski and H.J. Maris 699

Chapter 10. Imaging and surface acoustic waves

Acoustic wavefronts and internal diffraction
J.P. Wolfe and M.R. Hauser 702

Propagation and focusing of high-frequency Rayleigh phonons
C. Höss and H. Kinder 706

Images of surface acoustic waves on the (1 1 0) face of cubic crystals with liquid loading
A. Ikehata, R.E. Vines, S. Tamura and J.P. Wolfe 710

Singularities in surface acoustic microscopy phase images
A.G. Every, K. Hillmann, K.U. Würz, H. Hasselmann and W. Grill 714

High-temperature studies of surface acoustic wave velocities in silicon by Brillouin scattering
P.R. Stoddart, J.D. Comins and A.G Every 717

Experimental study of SAW harmonic generation for solitons
V. Kavalerov, H. Katoh, N. Kasaya, M. Inoue and T. Fujii 720

Effect of surface acoustic waves on single electron tunneling in scanning tunneling microscopes
N. Hatakenaka and S. Kurihara 723

Chapter 11. High-frequency phonons and spectroscopy

Phonon physics and the detection of solar neutrinos
J.S. Adams, S.R. Bandler, R.E. Lanou, H.J. Maris, T. More and G.M. Seidel 727

Phonon spectroscopy of oxygen defects in silicon and germanium
K. Laßmann 730

Single-pulse and multiple-pulse femtosecond spectroscopy: Progress toward collective mode-selective chemistry
H. Kawashima, M.M. Wefers and K.A. Nelson 734

Photo-produced phonons in semiconductors
M.E. Msall, S.E. Esipov and J.P. Wolfe 738

Particle detection and non-equilibrium phonons: Experience with large germanium crystals and NTD Ge thermistors
B. Sadoulet, D. Akerib, P.D. Barnes, A. Cummings, A. Da Silva, R. Diaz, J. Emes, S. Golwala, E.E. Haller, K. Itoh, W. Knowlton, F. Queinnec, R.R. Ross, D. Seitz, T. Shutt, G. Smith, W. Stockwell and S. White 741

Advances in Stanford phonon-mediated elementary particle detectors
B. Cabrera, P.L. Brink, B. Chugg, B.L. Dougherty, K.D. Irwin, S.W. Nam, A.T. Lee, J.G. Pronko, S. Tamura and B.A. Young 744

Heat pulse scattering from rough surfaces with long-range irregularity
A.G. Kozorezov, J.K. Wigmore, T. Miyasato and K. Strickland 748

Quasidiffusive propagation of phonons in vitreous silica
H. Ikari 751

Rapid and highly sensitive Au–Ge thermometers for the temperature range 30 mK–300 mK
S. Sahling, O. Béthoux, J.C. Lasjaunias and R. Brusetti 754

Nonequilibrium phonons in Cr^{3+} doped germanate glass
P.A. van Walree, A.F.M. Arts, H.W. de Wijn and A.A. Kaplyanskii 757

Dynamics of coupled electron–phonon modes in $LiY_{1-x}Ho_xF_4$
P.J. Rump, A.F.M. Arts, H.W. de Wijn and M. Nielsen 760

Quantitative phonon spectroscopy of interstitial oxygen in silicon
C. Wurster, E. Dittrich, W. Scheitler, K. Laßmann, W. Eisenmenger and W. Zulehner 763

The phonon spectrum of a normal-state tunnel junction
U. Wenschuh and W. Dietsche 766

Ultrafast acoustic phonon generation in gold
O.B. Wright and V.E. Gusev 770

Transport of terahertz nonequilibrium acoustic phonons in dense corundum ceramics
S.P. Feofilov, A.A. Kaplyanskii and M.B. Melnikov 773

THz-wave emission by coherent optical phonons
T. Dekorsy, H. Auer, C. Waschke, H.J. Bakker, H.G. Roskos and H. Kurz 775

Mutual conversion between electromagnetic and ultrasonic waves in high-T_c superconductors under magnetic field
H. Haneda, T. Ishiguro and M. Murakami 778

Phonon-induced spin-flip in extremely thin superconducting Al-films in high magnetic fields
J. Lang and W. Eisenmenger 781
